

RIDING FORWARD TSA TRAINING & DEVELOPMENT PACKAGE

As the Ofsted pendulum swings towards refocussing on the broad and rich curriculum, it's time to consider:

DIVING DEEP INTO COMPUTING

The new Ofsted inspection framework will focus on the real substance of education: the curriculum. Less time will be spent looking at tests and examination's data on inspection, and more time looking at what is taught, when it is taught and how schools have achieved their results.

Riding Forward TSA offers a unique training opportunity to support improvements in Teaching & Learning in Computing within your Primary School. This training is suitable for Computing Subject Leaders, aspiring Subject Leaders or HLTAs who are delivering the computing curriculum.

VENUE, DATES & TIMES

Venue: The training will be delivered via Microsoft Teams

Date: Tuesday 23rd February 2021 Time: 2.30pm to 4pm

BACKGROUND TO THE TRAINING & DEVELOPMENT PACKAGE

What makes teaching and learning in computing truly exceptional.

This course will demonstrate the value of computing in the primary curriculum; display how the subject can be linked to other areas of the school and national curriculum; and support with the development of key skills. The training focusses on a creative approach to developing essential computing skills across KS1 & KS2.

The course has been specifically designed to start at 2.30pm to support your school to release you at minimum cost to the school budget and class contact time.

OUTLINE OF THE TRAINING & DEVELOPMENT PACKAGE

The training package will look at how to develop the skills of primary aged pupils with practical ways to stimulate learning in computing using iPads and other hardware.

Through observing video clips, discussion and practical examples, delegates will be inspired in how to achieve an engaging, interactive approach to the teaching of computing.

Opportunities will include focussing on the connections to other subjects areas and learning outside the classroom.

Subject leaders will have the opportunity to discuss curriculum intent and progression; they will also have an understanding of how a computing curriculum has been structured to support them in 'diving deep' into their subject.... including tackling the lines of questioning that may arise in a "deep dive inspection".

COURSE LEADERS

Mr Simon Morton, Computing Subject Leader at Molescroft Primary.

COST & BOOKING

The cost of the training package is £59 per delegate for alliance schools, and £69 per delegate for non-alliance members.

If you wish to book a member of staff onto this event please contact Jenny Lines, Teaching School Business Manager.
